# Outsource to America™

Delivering Workforce Resilience

# The Situation

The COVID-19 crisis demonstrates that immediate disease propagation is now added to the risks of war, catastrophic weather events, political upheaval and global economic crises

**This requires IT and business ops workforce resilience**

American business must perform during crises, retain its competitive edge and maintain national security by deploying a resilient domestic IT and Ops workforce cost effectively

# Delivering Workforce Resilience

reduces offshore dependence and risk **at no additional cost**

improves business,  
IT and Ops  
performance

drives  
employment

revitalizes  
cities

enhances  
national security

# Enabling IT Workforce Resilience

automation and w@h **reduces offshore dependence and risk**

GalaxE's automation drives seamless knowledge transfer and achieves accuracy and consistency in delivery

+

proven w@h infrastructure and protocols enables real-time team utilization across the United States

+

led by GalaxE subject matter experts that average 12+ years of IT experience

## Proprietary Solution Forged from 30 Years of Practical Application At Fortune 500 Disrupters

GxFource™ combines a pervasive use of automation, deployment via trusted playbooks, exceptionally trained and experienced talent and a suite of end to end services.

### Products

Our data-driven automation delivers a holistic enterprise view of existing systems and processes.

### Playbooks

State-of-the art, time-tested GxFource™ playbooks are the path to successful transformation.

### gx|core™ Experts

Seasoned, engagement specialists and handpicked GxFource™ certified engineers.

### Services

GxFource™ includes a full spectrum of transformative platform-driven services.

*"If someone had asked us in December if we could move this fast [with Covid-19 response] with no notice we would have said no way."*

VP, Specialty Pharmacy and Operations, Top 5 Healthcare Organization

## Proven W@H Infrastructure and Protocols

Enabling Real-time SME Utilization around the Country and around the Globe

### Flexible

Our proven infrastructure and protocols are ready at a moments notice enabling SMEs anywhere around the globe and right in your city.

### Rapid Response

A fully tested set of compliant protocols and infrastructure is ready to deploy globally. Our systems are secure with resources ready to support you immediately.

### Secure

All facilities, infrastructure, hardware, software, networks and applications are fully secure to ensure maximum continuity. All offshore facilities are CMMi Level 3, ISO 9001:2015, and ISO 27001:2013 certified.

### Compliant

We have 30 years of experience working in highly regulated environments and understand many of the challenges you may be facing. Our resources and infrastructure meet all HIPAA requirements and then some.

*"Incredible [deployment of GxWorx™] – Can't thank you enough! "*  
CIO, Fortune 100 Healthcare Organization

# Achieving Resilience by the Numbers

**33M**

Over 33 million unemployed Americans require opportunities, training, educational alignment, and urban revitalization  
*(Source: Bureau of Labor Statistics)*

**4M**

Over 4 million IT professionals employed in India alone competing for U.S. jobs  
*(Source: NASSCOM)*

**5M**

Nearly 5 million IT professionals located inside the U.S. now accessible through w@h  
*(Source: LinkedIn)*

**3M**

Estimated 3M IT professionals live outside major centers ready to fuel urban renewal in their cities  
*(Source: IBISWorld Industry Report IT Consulting in the US, April 2020)*

# Outsource to America™

**educate, re-train, empower and  
deploy America's resilient IT workforce**

Considering the challenges in disruption of business operations and limitations of traditional off-shore models, predicated on large-scale labor arbitrage, and the issues of security, time zones, proximity, equipment, connectivity, privacy and host country national interest, one cannot imagine a more compelling reason to bring work back onshore

O2A focuses IT spend on workforce redevelopment and urban revitalization in targeted cities using public/private partnerships with GalaxE, core customers and state, educational institutions, local and federal government
